Test of TechNiche’s

TechKewl Cooling Vest at an Waste Incineration Company

We were asked to supply our TechKewl™ PCM Cooling Vests for test purpose executed by a waste incineration company.

During the test they made photo’s with a special thermal imaging camera in order to show / proof the testing results.

Usually the incineration workers do work 1 hour and have than a break of 30 minutes.
Here the pieces of garbage will be burned. The core temperature of the material during the incineration is 1,300° Celsius. The environment temperature of the workers is 80° Celsius.
On the right you see the worker in protective clothing where the temperature of 80° Celsius was measured during the work.

TEST
CONCLUSION

Workers feel very comfortable, have a better concentration and so perform better.

Workers can work now for 3 hours with a break of 10 minutes.

Both employer and workers are very happy with the new work situation.
Phase Change Cooling Products

Product Benefits

- Commonly used under hazardous materials suits, military combat gear, mascot costumes and other apparel
- Phase Change Material (PCM) releases long-lasting, temperature-specific (14 °C) cooling relief
- PCM is non-toxic, non-flammable, durable, re-usable, lighter than water, and does not produce condensation
- Cost effective personal cooling solution
- Targeted cooling for key heat zones
- Enhance comfort and performance
- Provide cooling comfort and heat stress prevention
- Additional PCM inserts are sold separately for extended relief

Phase Change Cooling Inserts maintain a comfortable 14°C for up to 3 hours
Phase Change Cooling Products
How it Works

- Submerge PCM inserts in ice water for up to 45 minutes, or place in a freezer, until solid
- Return inserts to garment pockets
- Wear; repeat steps as needed (or use additional inserts for continuous relief)
